

INVESTMENT OBJECTIVE

The fund aims to earn a higher total rate of return than that of the South African equity market, as represented by the return of the FTSE/JSE Capped All Share Index including income, without assuming greater risk.

INVESTOR PROFILE

Investors requiring long-term growth and who are able to withstand investment volatility in the short to medium term. Available as a tax free investment account.

MONTHLY PORTFOLIO PERFORMANCE VS BENCHMARK

In managing South African equity portfolios, Foord aims to construct a diversified portfolio of quality companies bought at reasonable prices to achieve long-term returns with minimum risk of capital loss. The chart above depicts the monthly returns of the portfolio relative to the monthly returns of its benchmark. Bars above the x-axis show months of outperformance against the benchmark, while bars below the x-axis show months of underperformance. Red bars represent months when the benchmark was negative and yellow bars represent months when the benchmark was positive. The chart illustrates that the portfolio has outperformed the benchmark 70% of the time when the market was down (red bars above the x-axis). Put differently, the portfolio has achieved after-fee returns in excess of the market, with lower risk of capital loss.

COMMENTARY

- Global equities (-7.2% in US dollars) were led lower by US bourses (-9.1%) after Trump's public criticism of Fed Chair Powell failed to deter a rate hike amid weakening economic data and a partial US government shutdown – emerging markets (-2.7%) were also negative as China (-6.1%) underperformed on unclear trade war progress and a slowing domestic economy
- The FTSE/JSE Capped All Share Index (+4.2%) was supported by resurgent resource counters (+12.3%) on higher precious metals prices and rand weakness (-3.5% vs the US dollar) – financials (+0.6%) and industrials (+2.4%) lagged
- The gold mining sector (+25.2%) was led higher by the rising gold price (+4.8% in US dollars) on safe-haven appeal – the underweight allocation to precious metals companies was partially offset by the Newgold ETF (+10.2%) investment
- Core holdings in British American Tobacco (-1.3%), Anheuser Busch Inbev (-10.5%) and Aspen (-8.3%) detracted as the market continued to de-rate companies that exploited cheap leverage to make acquisitions – the managers expect this to be a temporary phenomenon and maintain the investments given attractive valuations
- The lower allocation to SA Inc. companies in the consumer/services sectors added value as food producers (-0.4%), household goods (-3.4%) and general retailers (-0.1%) underperformed – local company valuations are becoming more appealing, but the consumer remains stressed
- The below-index allocation to financial shares also contributed positively given the sector's underperformance – although valuations are reasonable, the managers retain a prudent weight given the market cycle
- The high cash position detracted this month but added value over the year – cash affords the necessary liquidity to exploit the long-term investment opportunities thrown up by the bear market

FEE RATES (CLASS A)

Initial, exit and switching fees	0.0%
Standard annual fee for equalling benchmark	1.0% plus VAT
Performance fee sharing rate	15% (over- and under-performance)
Minimum annual fee	0.5% plus VAT
Maximum annual fee	Uncapped

ANNUALISED COST RATIO (CLASS A)

	12 MONTHS	36 MONTHS

—Performance	-0.58%	-0.48%
Transaction costs*	0.08%	0.10%
Total cost ratio	0.67%	0.78%

* The quantum of transaction costs is affected by the quantum of the gross in- and outflows over the period presented.

FEE STRUCTURE

The annual fee is based on portfolio performance fee with the daily fee rate being adjusted up or down based on the portfolio's one-year rolling return relative to that of its benchmark and subject to a minimum fee rate.

PERFORMANCE FEES

Performance fees align investor and manager return objectives by rewarding the manager for outperformance while penalising the manager for underperformance. Foord's performance fee structure increases or decreases the daily fee levied based on the over- or underperformance of the Foord unit trust portfolios relative to their benchmarks. When the portfolio return exceeds the benchmark return, the daily performance fee rate is increased proportionately. Similarly, underperformance causes the daily performance fee rate to decrease proportionately. Performance fee rates are not capped for the reason that outperformance is generally not earned smoothly.

The annual fee is adjusted up or down daily by the performance fee calculated as the difference between the rolling one-year net-of-fee return and the benchmark return for the same period, multiplied by the performance fee sharing rate, which may vary from fund to fund.

IMPORTANT INFORMATION FOR INVESTORS

Foord Unit Trusts (RF) (Pty) Ltd (Foord Unit Trusts) is an approved CISCA Management Company (#10), regulated by the Financial Services Board. Portfolios are managed by Foord Asset Management (Pty) Ltd (Foord), an authorised Financial Services Provider (FSP: 578). The custodian/trustee of Foord Unit Trusts is RMB Custody and Trustee Services (a division of FirstRand Bank Limited), contactable on T: 087 736 1732, F: 0860 557 774, www.rmb.co.za.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Performance is calculated for the portfolio. Individual investor performance may differ as a result of the actual investment date, the date of reinvestment and withholding taxes. Performance may be affected by changes in the market or economic conditions and legal, regulatory and tax requirements. Foord Unit Trusts does not provide any guarantee either with respect to the capital or the performance return of the investment. Unit trusts are traded at ruling prices and can engage in borrowing. Foord Unit Trusts does not engage in scrip lending. Commission and incentives may be paid and if so, this cost is not borne by the investor. A schedule of fees and charges and maximum commissions is available on request. Distributions may be subject to mandatory withholding taxes. A fund of funds invests only in other Collective Investment Scheme portfolios, which may levy their own charges, which could result in a higher fee structure. A feeder fund is a portfolio that, apart from assets in liquid form, consists solely of units in a single portfolio of a Collective Investment Scheme which could result in a higher fee structure. Foord Unit Trusts is authorised to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate.

UNIT PRICE

Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio. Forward pricing is used. Prices are determined at 15h00 each business day and are published daily on www.foord.co.za and in national newspapers. The cut-off time for instruction is 14h00 each business day.

TER

A Total Expense Ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual fee, VAT, audit fees, bank charges and costs, including trading costs, incurred in any underlying funds. Included in the TER, but separately disclosed, is a performance fee (or credit) resulting from overperformance (or underperformance) against the benchmark. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER. The TER for the fund's financial year ended 28 February 2018 was 0.75%.

FOREIGN INVESTMENT RISK

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.
